

IoT and Telemetry Village at WWEM to be co-sponsored by the LPRA

The Low Power Radio Association has been appointed as the official co-sponsor of the IoT and Telemetry Village at this year's Water Wastewater and Environmental Monitoring show WWEM, to be held between the 21st and 22nd November 2018 at Telford.

Vice Chair of the LPRA, Mr Brian M Back stated "I have always been a great fan of WWEM, its focus on sensing and monitoring for the water, wastewater and environmental sectors makes it an ideal location for an IoT and Telemetry Village and we are proud that the LPRA has been selected to be its co-sponsor. Virtually every sensor these days has some form of connectivity and wireless whether it is Bluetooth for programming or Radio Telemetry / IoT for longer distance communications.

Mr Back who has been involved in the delivery of Radio Telemetry and IoT applications for the past 30-years stated. "For those that do not know the LPRA, is a not for profit the trade body set up in the early 1990 to act as an interface between government, regulators and industry on wireless matters including Telemetry and more lately IoT". He added "I personally have been involved with the LPRA since its inception and my own business RDN has always been a member. Further, I have found the LPRA an invaluable source of knowledge and very good value for money. Not only do we get the chance to get market insight, a monthly news-letter, on-line promotion, but there is a fantastic free to attend bi-annual conference called Radio Solutions."

The next Radio Solutions is in May 2019 and tickets can be reserved now by visiting the <http://www.lpra.org/news/new-article-page-158/>

In summary, it is just 2-months before the doors at WWEM open. This year's show is packed with exhibitor and the conference line-up is top rate. All visitors get free tees, coffees and lunch. To reserve your tickets please use the link below. <https://www.ilmexhibitions.com/wwem/>

We look forward to seeing you there on either or both the Radio Data Networks or LPRA stand.
